Introduction

In issuing this new catalogue for the spring of 1916, I take great pleasure in thanking my many friends for their generous patronage in the past and I hope to merit a continuance of your patronage.

I am always glad to welcome visitors to my gardens who are interested in hardy plants and flowers. Our gardens are located on the improved Ridge Road 17 miles from Rochester. Rochester and Sodus Bay cars stop directly in front of the premises. It is only about five minutes walk from Fruitland Station on the R. W. & O. R. R.

GUARANTEE—If I hope to retain trade, I can send only such stock as is true to name, first-class quality and in good condition when it leaves my place. Since I have no control over stock after it leaves my place, I cannot assume responsibility for failures due to improper planting or neglect after the plants have left my hands. I guarantee safe arrival of all stock sent by express. I also guarantee all stock true to name, and in a healthy growing condition when it leaves my hands. Any stock which proves otherwise will be gladly replaced or the price therefor refunded. I never substitute inferior varieties for those ordered, but should a variety ordered be sold out, I will fill the order with a similar or better variety, correctly labeled, unless instructions to the contrary are given in the order.

The prices quoted in this list are as low as is consistent with the quality of stock we send out. In some cases, our prices will be found lower than prices quoted by others, but in no case will we send out any stock except of the highest quality.

When ordering, please write your **name, postoffice, county and state** plainly and give your nearest express office address, if it is different from your postoffice address.

It is **very important to order early**. Our stocks of some of the choicest varieties is limited and it is often impossible to secure them late in the season.

Cut Flowers—During the blooming season we can generally supply fancy cut flowers of Iris, Peonies, Gladiloli, Dahlias and other hardy plants.

Make all remittances payable to

Gardens and American Express Office, Fruitland, N. Y.

Gladioli

Gladioli are of very easy culture. The bulbs may be planted as early as the ground can be worked and for a succession of bloom every two weeks up to July. The ground should be dug deeply and the bulbs planted 4 to 6 inches deep. They may be planted in rows 1 foot apart and 5 to 6 inches apart in the rows. A sandy loam soil, away from the shade of trees or buildings, suits them best, although they will thrive in any good garden soil.

	Ea.	Doz.	100
AMERICA —Large, clear lavender pink. The best pink	\$.05	\$.35	\$ 1.30
ATTRACTION —Large, rich, dark crimson; clear white throat05	.50	3.00

Gladiolus bulbs at the each and dozen prices are sent prepaid; at the 100 price they are sent by express. 6 at the dozen rate and 25 at 100 rate.

Dahlias

CULTURE—The Dahlia will grow in any good garden soil. The soil should be worked deep and well prepared. Large quantities of manure should be avoided, as it tends to produce a heavy growth of foliage at the expense of bloom. An application of bone meal or good commercial fertilizer will generally be found sufficient. The roots should be planted $2\frac{1}{2}$ feet apart in rows 3 feet apart. They should be laid down flat and covered with four or five inches of soil. They may be planted as soon as frost is over, but in our climate we have found June the best month to plant them out. In case the plants become stunted by hot, dry weather cut them back so that they will produce new wood for the cool months of autumn.

After the plants have been frozen in the fall, dig carefully and store the roots in a dry, cool cellar for winter. In the spring, the roots should be divided, preferably to one eye, before planting.

We list only those varieties which we can recommend and which have been selected from our large collection.

CLASSIFICATION OF DAHLIAS

CACTUS DAHLIAS—These are of recent introduction and are becoming very popular. In form they somewhat resemble the Chrysanthemum, the petals are long, narrow, incurved and sometimes twisted, giving them a very graceful appearance.

DECORATIVE DAHLIAS are the largest flowering of any type. They have long, broad, flat petals.

SHOW DAHLIAS are the old-fashioned large, round, compact and quilled flowered type.

FANCY DAHLIAS are show Dahlias, having the flowers tipped or edged lighter than the ground color.

PEONY FLOWERED DAHLIAS are the newest type, and somewhat resemble the peony in form. The flowers are generally semi-double, exposing a golden yellow disk in the center. They are very beautiful and free flowering.

POMPON DAHLIAS are identical in form with the show dahlias but are small.

SINGLE DAHLIAS have a single row of petals surrounding a golden yellow center. They are very graceful and free flowering.

COLARETTE DAHLIAS are single Dahlias having a row of shorter petals around the disk, usually of a different color from the outside row.

Cactus Dahlias

	Each
ALFRED MORGAN —Very large, deep crimson	\$.20
AMBASSADOR —Pure white, beautiful form20
AURORA —Soft pink, tinted white overlaid gold, Early and free20
BELOIT —Very large, deep red on long stems. New and distinct35

We will send six of the varieties listed at 10 cents for 50 cents, six of those listed at 15 cents for 75 cents, etc. Prices quoted are for strong divisions of field grown roots, not rooted cuttings which are never as satisfactory. Dahlia roots at the each and dozen prices are sent postpaid.

For \$1.00 we will send prepaid 15 Dahlias, no two alike, not labeled, but all good varieties.

Hardy Roses

CULTURAL DIRECTIONS—Roses prefer what is termed a deep clay loam soil. It should be well drained and away from the shade of trees and buildings. The soil should be deeply and thoroughly prepared and liberal applications of well rotted manure applied. The plants may be set eighteen inches apart in rows two feet apart. When planting budded bushes, the union of the bud and stock should come at least two inches below the surface of the soil. They should be planted as early in the spring as the soil is dry enough to work. After planting the shoots should be reduced to two or three and these cut back to at least four inches from the ground.

The stock we send out is 2-year-old, field grown and budded low. It is American grown and thoroughly acclimated to our soil and climate. Our stock of roses is first-class in every particular and should give a full crop of bloom two months after planting.

Hybrid Perpetual Roses

These are strong growing and generally hardy without protection. They produce a very abundant crop of large flowers in June and more or less continuously all summer.

Strong, 2-year-old, field grown plants, except where noted, 30 cents each, \$3.50 per doz., six at dozen rate. Roses are sent by express charges collect.

ALFRED COLOMB—Very large, brilliant red, full and globular in form. Fragrant.

ANNE DE DIESBACH—Brilliant carmine; long pointed buds; very fragrant. One of the best.

BARONESS ROTHSCHILD—Beautiful pale rose, of good form and a reliable bloomer. Lacks fragrance.

CLIO—Flesh, shading to pink in the center. Very vigorous and free.

FRAU KARL DRUSCHKI—Produces perfectly formed blooms of pure white. The very best white rose for the garden. 35c each; \$4.00 per dozen.

GEN. JACKQUEMINOT—Bright crimson scarlet, very fragrant. Very popular.

HUGH DICKSON—Crimson shaded scarlet, very large and full, long pointed buds. Very fragrant. One of the best.

- J. B. CLARK**—Deep scarlet, shaded darker. Very large.
- MADAM GABRIEL LUIZET**—Silvery pink. The flowers are large and full and the plant a reliable bloomer.
- MARIE BAUMAN**—Crimson carmine, very large full, elegant form. Very fragrant.
- MARSHALL P. WILDER**—Cherry-carmine, full semi-globular, very fragrant.
- MRS. J. LANG**—Soft pink, large full and of perfect form. The best pink garden rose.
- PAUL NEYRON**—Deep rose. Very large.
- PRINCE CAMILLE DE ROHAN**—Very deep velvety crimson. The best very dark rose.
- ULRICH BRUNNER**—Very large rich crimson, good form and a reliable bloomer.

Hybred Tea Roses

These are the most important garden roses. They are the result of crossing tea roses with the hybrid perpetual roses. They combine the hardiness of the hybrid perpetual roses with the everblooming qualities of the tea roses. These will be benefitted by some winter protection in the North.

Except where noted 35c each, \$4.00 per dozen.

- BESSIE BROWN**—Creamy white, very large, full and of good substance. Well formed, long pointed buds and very fragrant. One of the very best.....50c each
- ETOILE DE FRANCE**—Velvety crimson, well formed bud, fragrant and free.
- GRUSS AN TEPLITZ**—Bright crimson scarlet. Blooms in clusters and is very fragrant. One of the best bedding roses.

TO MY PATRONS—I shall be glad at any time to make suggestions as to the selection of varieties of plants or shrubs for any given purpose or to assist in making up collections of either standard varieties of plants or of novelties. I shall undertake to secure at reasonable prices any plant or shrub for my patrons, which I may not have in my large collections. Information relating to the culture of special plants will be frankly and freely given at any time.

Kindly send me the names of your flower loving friends. I shall be glad to send them copies of my catalogue and will repay you by including extras with your order.
